

Environmental protection – a global challenge

In the video “Environmental protection (2014): Environmental protection is a prerequisite for survival on this planet” it is shown how environmental problems are no longer just local; they have become global. It therefore requires international cooperation and networking. The last sentence in the video says:

“There are many daunting challenges yet to be tackled.
This is and will remain a crucial task – for scientists, politicians, economists,
and for each and every one of us”.

Exercise (Group work)

Let us assume that you are a group of **scientists**. Which short-term and long-term challenges do you face? Write a short text with which you can inform the participants of the upcoming Lindau Nobel Laureate Meetings and call for assistance.
