

“What is adrenalin actually?”

“A protein secreted by the adrenal glands”.

“...I thought it was a hormone”.

“Hormones are proteins...”

“And what activates the adrenalin secretion?”

“Well, protein...”

“But how does adrenaline build up before it is secreted?”

“Mainly with the help of proteins!”

“Hmm...well then, what produces adrenalin?”

“The rapid provision of energy reserves”.

“How so?”

“...activation of certain proteins”.

“Let me guess: When adrenalin is broken down, it is surely with the help of...”

“...Proteins!”

“...Proteins!”
