

Task 1: Create a profile of your virus. If necessary, do some research on the internet.

Name of the virus	
Size	
This disease is caused	
Occurrence (e.g. worldwide, regional...)	
Discovery	
How can you get infected with the virus?	
Incubation period	
Symptoms of the disease	
Protection from the infection	
Healing the disease	
Other features	

Task 2: Introduce your profiles to each other. Write down the most important points in the mind map so that you have an overview of all three viruses!
